

# EPIC GDPR INSIGHT

## Value adding due diligence within GDPR (the lawful processing of personal data)

EPIC GDPR INSIGHT is a crucial legal service to check the current GDPR compliance of a specific company and to develop a future proof structure that supports the growth of businesses who are dependent on the processing of personal data. No, you do not want yet another fact-finding report. What you need is a crystal clear risk assessment and a step-by-step plan on how you reduce the risk with a comprehensive toolbox at your disposal. And that's what we'll create for you.

### You get

- A comprehensive yet concise and to the point report on the level of compliance, the gaps identified, and a plan for closing the gaps and reducing your risk - short and long term
- An assessment of what means that reduce risk the most while putting the least limitations on the company's organisation and operation
- A full analysis of the data flow, relevant tests, and coaching of the employees where relevant

Furthermore, we can offer you our toolbox to ensure that the company is GDPR compliant (or perceived compliant). The company will avoid fines for being compliant and you cannot be accused of not having done anything.
